Jstor is a digital library of academic journals, books, and primary sources. Carl Gustav Jung, född 26 juli 1875 i Kesswil i Thurgau, död 6 juni 1961 i Küsnacht i kantonen Zürich, var en schweizisk psykiater som i flera år samarbetade med Sigmund Freud, men som senare bildade en egen skola, den analytiska psykologin. Hans arbete har haft stort inflytande inte bara inom psykologin, utan även exempelvis inom religionshistoria, litteratur och filosofi. Having lived through both world wars, Jung was aware of the dangers of what he termed "psychic epidemics." He discussed the spontaneous manifestation of an archetype within collective life as indicative of a critical time during which there is a serious risk of a destructive psychic epidemic.
